

CourierPost is proud to be able to provide a donation to the Motuihe Island Restoration Project with the donation coming from the proceeds of their 'Back Track your Trackpaks' recycling program. As part of CourierPost's wider focus on sustainability, this recycling program was launched in November 2007. It involves CourierPost providing collection bags for their customers to place any of theirs, or competitors, used plastic courier bags. These are then collected on a regular basis to be recycled with the proceeds donated to a charity of their choice. With CourierPost having a strong focus on sustainability it's important to them that they select charities that are aligned with in similar efforts. CourierPost is the only courier company offering this service and the program has been well received by customers who can now minimize their waste and further reduce their carbon footprint.'
